5th Lx Kaggle Meetup @ NOVA IMS

October 27 @ 15:00 - 19:00 - [Free](#)

Hello world! And a special hi to kaggle aficionados and data science enthusiasts out there! This next meetup is going to be really interesting! We will use a Kaggle challenge to focus on model evaluation and interpretation. We're also happy to say that the meetup will be longer than usual, meaning we will have time to really study those models thoroughly 🤖

Please register at meetup.com to participate: <https://www.meetup.com/Lisbon-Kaggle/events/255582990/>

WHAT WE WILL DO

There are two types of reactions when a model produces 99.99% accuracy on your training set: (1) "this is the best model in the world and I'm a data science genius!" and (2) "nice! But could this thing be overfitting the training data?". Overfitting is a common problem in data science, and it is just one aspect of model evaluation. In this meetup, we will deliberately skip the initial data cleaning and feature engineering part of the process and zoom in on model evaluation and interpretation.

Using data from a Kaggle challenge, we propose to first split the training set into training, validation and test subsets, in order to tune and evaluate different types of models. How do these models perform versus a simpler baseline model? Which of the models is doing a better job at predicting the results?

The DSPT meetup #41 is sponsored by

Agenda

- 18:30 - 19:00 Welcome and get together
- 19:00 - 19:30 **"Creative Applications of Music Information Research"**
by Matthew Davies - INESC TEC
- 19:40 - 19:45 Group Photo
- 19:45 - 20:15 Networking / Beer Break 🍺🍺
- 20:15 - 20:45 **"Big (Unlabeled) Data: a quest to create a fish detection dataset"**
by Pedro Costa - Abyssal
- 20:50 Closing
- 21:00 Dinner

Creative Applications of Music Information Research

Matthew Davies
INESC TEC

PORTUCALENSE UNIVERSITY INFANTE D. HENRIQUE

MASTER IN DATA SCIENCE

Science for computational and inferential thinking
Fall 2019

ABOUT THE COURSE

To train specialists in analyzing, interpreting and developing software based on mathematical and statistical models

Professionals with strong multidisciplinary knowledge to extract data information helping companies in decision making

Professionals with profiles of both engineers and scientist

Data scientists with skills in innovation, creativity and interpersonal communication

COURSE STRUCTURE

1st year, 1st semester:

- Exploratory Data Analysis
- Programming for Data Scientists
- Data Science Perspectives
- Estimating, Detection and Learning I

1st year, 2nd semester:

- Estimating, Detection and Learning II
- Machine Perception
- Emerging Paradigms for Big Data
- Natural Language Processing
- Statistical Graphics and Visualization I

2nd year:

- Dissertation, Project or Internship
